

SHUBHAM KOSHTI

Artificial Intelligence Engineer

+918407982839 | [Gmail](#) | [LinkedIn](#) | [GitHub](#)

Summary

My goal is to get associated with an organization where can efficiently utilize my knowledge and skills to gain further experience while enhancing company's productivity.

Skills

Python • Flask • Django • SQL • PostgreSQL • Machine Learning • OpenCV • Computer Networking

Languages

English, Hindi, Marathi

Work Experience

Software Developer Intern

Dec 2023 – Jun 2024 • 6 mos

e-Beta innovations LLP • Internship

Remote **Technologies:** Python • Flask • Flask-RESTful • Django • API

As a **Software Developer Intern** focusing on Python backend development, I'll be involved in building the server-side logic of web applications. Python, with its versatility and readability, is a popular choice for backend development, and *Flask* and *Django* are two prominent frameworks that simplify the process.

Projects

Real Life Game Streaming

Technologies: Python • Machine Learning • OpenCV • Pandas • Matplotlib • MediaPipe

This Python project translates a player's real-world movements in front of a camera into in-game controls. It uses libraries like MediaPipe and OpenCV for pose estimation and sends keystrokes to the game using PyAutoGUI. This allows players to control VR games with their bodies at 20 frames per second.

Flask Video Streaming

Technologies: Python • Machine Learning • OpenCV • Pandas • Matplotlib • MediaPipe

Flask (Python web framework) enables video streaming by breaking videos into parts and sending them continuously to the browser. You create a route to handle video requests and use libraries like OpenCV to process the video and send it as a stream. Users can watch the video in real-time through a URL.

Early Prediction of Parkinson's Disease using Deep Learning

Technologies: Python • Flask • Deep Learning • Convolutional Neural Networks • Tensorflow • NumPy • Pandas

This project explores using deep learning, specifically Convolutional Neural Networks (CNNs) built with Tensorflow, to diagnose Parkinson's disease. By analyzing medical scans or MRI samples, the CNNs aim to achieve over 97.8% accuracy in differentiating Parkinson's patients from healthy individuals, potentially aiding doctors in more precise diagnoses.

Education

Bachelor's degree: Artificial Intelligence

Jul 2021 – Jul 2024 • 3 yrs

G H Raisoni College Of Engineering And Management, Pune, India

• Achieved Bachelor Degree at Savitribai Phule Pune University, Pune

• Conquer **8.72 CGPA** in *Artificial Intelligence Engineering*

Diploma Degree: Computer Engineering

Jul 2018 – Jul 2021 • 3 yrs

Government Polytechnic, Jalgaon, India

• Completed a *Diploma in Computer Engineering* at Government Polytechnic, Jalgaon (2018-2021) with Grade/GPA: **89.60**, also equipping myself with the technical foundation career in software development.

Certifications & Awards

- Research Paper of Parkinson's Disease using Deep Learning Certificate - Springer, Government Of India
- Copyright On Parkinson's Disease Project Poster and Certificate - Copyright Office, Government Of India
- Machine Learning - Dimensionality Reduction certificate - cognitiveclass.ai by IBM Developer Skills Network
- Google Analytics and Advanced Google Analytics Certificate - Google Analytics Academy
